# PERSONAL PROFILE

Hi, my name is Fernando Falci, I'm a web developer and I've been working in this area since my graduate, 5 years ago.

I started as a freelance, in small jobs, usually PHP and Javascript (Wordpress).

When I decided that I was ready for a professional experience, I started working at Elotech (http://www.elotech.com.br). In that company I worked as a PHP developer, using Zend Framework e jQuery, in a project for health area.

Sometime after that, I switched the PHP for Java and the jQuery for AngularJS. I started a post-graduate course to help me in this switch. I did well. Meanwhile, I did an HTML5, CSS3 and Javascript certification, from Microsoft; and also an Associate Java 8 certification, from Oracle.

Now I'm at MATERA Systems (http://www.matera.com/en/). I work in an international project, for one of the biggest telecommunication companies from the USA (in the Fortune 500 list). It's amazing how much new technologies we are using here: microservices, AWS cloud, several Netflix OSS projects: Eureka, Governator, Asgard, Archauis, Hysterix, Kayron, Zuul. I've learned new things like code review, scrum, different environments for each project phase (dev, test, prod).

Here we like to do lectures and workshops, for our colleagues and for the community. I took part in few of them: Docker, Cassandra, Meteor, Material Design. I also taught some: AngularJS, Chrome Inspector, Lambda (Java 8).

One year ago I started working on another project, part time, for Mobile DI (http://www.mobile-di.com). I participated in a project so that voters can express an opinion on the bills of your region. Now I'm on another project, for a management of activities during development. In this project, we are using NodeJS and AngularJS. I'm managing a small team of 3 developers and 1 QA, it's challenging.

Well, this is just a resume of my professional experiences. Feel free to contact me.

SKILLS
A.K.A.: Keywords

Javascript   HTML   AngularJS   Leadership   NodeJS   CSS/Sass/Less   Java   PHP   Jersey   Guava/Guice   Netflix OSS   GIT   Jira/Stash   Jenkins   Postgres   MySQL   Oracle   MongoDB   Cassandra   Redis   Sockets   AWS   Nginx   Scrum   XP   Code Review   Pair Programming   TDD   Jasmine   Karma   Chai   Mocha

EDUCATION
The base of my knowledge

UniCesumar - Maringá

Java Postgraduate - **In Progress**

The course has provided a thorough overview of Java and its related technologies in order to be able to choose those that meet the particular requirements of various fields of existing applications and is also able to develop systems in java applying object orientation and design patterns. Development in Java for desktop, web, mobile devices and enterprise environment was addressed.

UNIPAR - Guaíra

Analysis and Systems Development - **Graduate:** 2010

Kickoff of my professional career. The course provided a solid foundation for the development of systems. Beginning of networking that keeps growing up. Laureate as best student of the course, consider this one of the most important steps in my career.

EXPERIENCE
Some important companies of my professional career

MATERA Systems

Developer / Maringá, PR / 2014 - Current

Acting as a developer on an outsourcing project for an US company. Keywords: Netflix OSS, Jersey, Rest API, micro-services, outsourcing.

Confidential

Developer / Maringá, PR / 2012 - 2014

I worked in two different products. One facing the electoral data management and another for back office of a large supermarket chain. Keywords: Java, JSP, Oracle, outsourcing, Android.

Elotech

Developer / Maringá, PR / 2011 - 2012

I worked on developing solutions in a healthcare software. Keywords: PHP, Zend Framework, jQuery, Postgres, Full Stack, UX.
